**Grounds Maintenance & Landscaping
Services**

Ornamental lawns maintained by my ground maintenance team leader Jamie and Charlie, his right-hand man, to our usual standard

Weekly hedge and
lawn maintenance at
one of our school sites

We took on a new client, Flixton Girls School at the beginning of the year. The previous franchised contracting business had left the site in a mess and this hedge is one example. We decided to bring our hedge flail out which is able to tackle unruly growth such as this with ease. This was completed in just 1 hour and the finished result is startling.

Collecting our new Major TDR
16000 professional sports mower

purchase brand new in March
2018

Sports field mowing carried out by myself, a job I take great pride and enjoyment in, as its important for me to remain an owner operator. Our sports fields are maintained to the highest standards which is reflected in the value of our investment in good quality machinery. This unit alone has a value of £114,000. A huge investment for us but worth every penny.

Our laser guided line markers allow us to produce perfectly straight line marking on turf, astroturf and hardstandings

A recent addition to our equipment list, the weed brush. This is used to clear moss and algae from kerb and building edges, along with larger shaded areas where moss has become a problem creating a slip hazard. The weed brush is our mechanical solution, which we combine with scheduled chemical treatment to prevent the same reoccurrence. This was another one of Jamie's idea's, our team leader on the ground maintenance.

Jamie like myself strives to improve our service standard and tackle a problem. The weed brush has now been added to many of our school SLAs. Jamie's input of fresh ideas to the business, dedication and hard work is continuing to set us apart from our competition in this growing and competitive sector. Jamie also organises and runs our busy yard, providing support to the tree teams with larger tree works, where larger equipment movements are required.

ELMHOUSE
tree services

Landscape project designed by myself for Stretford Grammar 2014 utilizing a local architect to help visualize a design for the client before the project commenced. This was built and installed by myself and the team including my father, who also has a long-standing ground maintenance company.
